BACHELOR OF ARTS IN PSYCHOLOGY 2018

PROGRAM RATIONALE

The Bachelor of Arts in Psychology (ABPSY) program is designed to provide students with a solid training in using well established scientific principles in understanding and analyzing human behavior and cognitive processes. In this program, students will be trained intensively in areas such as psychological assessment, experimental psychology, cognitive psychology, abnormal psychology, social psychology, counseling, theories of personality, and others. This program further trains students to specialize in industrial psychology thus allowing students to pursue meaningful employment in the field of human resources. To accomplish this, courses such as human resource management, human resource staffing and development, group dynamics, strategic human resource, and recruitment and selection are included.

In addition to the specialized subjects, students will undergo almost 1,000 internship hours. Furthermore the internship program is divided into two. The first part will allow students to gain work experience in organizational development and employee engagement and while the second part focuses on human resource development.

The program will also prepare students to become licensed psychometrician or to pursue graduate studies.
